HRMS
Admin & Super Admin Access Control

Privileged Access Reference

This document covers Super Admin and Admin only.
Operational roles are documented in a separate manager PDF.

Document type	Privileged access reference
Audience	System owners, HR leadership, IT / product
Companion doc	HRMS Role-Based Access Control (operational)
Date	18 September 2026
Classification	Internal / Confidential

1. Purpose

This document describes the highest privilege roles in HRMS: what Super Admin and Admin can see and do, how they differ, and which actions only these roles can perform.

2. Roles Covered

Role	Data visibility	Privilege summary
Super Admin	Entire organization	Highest access - full control including report emails
Admin	Entire organization	Same day-to-day power as Super Admin, except report emails

3. Feature Access Comparison

Feature	Super Admin	Admin
Analytics / Overview	View	View
Billable / QA hours / Tracker / QC / KRA	View (+ Export for KRA)	View (+ Export for KRA)
User Monthly Goals	Edit	Edit
Manage Users	Manage	Manage
Manage Projects / AFD / Category / Permissions	Manage	Manage
Roster generate / edit / submit	Manage	Manage
Roster approve / reject	Approve	Approve
Roster week lock	Manage	Manage
Holiday master	Manage	Manage
Report emails	Manage	No access
Salary details	View	View
QC form / Entry screens	Allowed	Allowed

4. Super Admin - Detailed Capabilities

Highest access level in the system. Organization-wide scope (no team lock).

- • View all analytics, billable, QA hours, tracker, QC, and KRA for the entire organization
- • Edit User Monthly Goals for any team / agent
- • Create, edit, and delete users
- • Fully manage projects, AFD, categories, and permissions
- • Full roster control: generate, edit, submit, approve/reject, lock weeks, holiday master
- • Manage report email settings
- • View salary details

5. Admin - Detailed Capabilities

Same as Super Admin for day-to-day operations, with one difference: Admin cannot manage Report emails.

Area	Admin vs Super Admin
Report emails	Admin cannot manage report emails
Roster approve / reject / week lock / holidays	Same as Super Admin
Users / projects / org-wide reports / salary	Same as Super Admin

6. Privileged Actions (Admin / Super Admin Only)

These actions are not available to Project Manager, Assistant Manager, Team Leader, QA, or Agent:

1. Approve or reject roster submissions
2. Lock roster weeks
3. Manage holiday master
4. Manage report emails (Super Admin only)

Note: Project Manager may see org-wide data and edit roster requests, but cannot approve roster.

7. Important Rules

1. Assign Super Admin / Admin only to trusted system owners.
2. Prefer Admin when report-email configuration is not required; use Super Admin when it is.
3. Creating a user as Admin or Super Admin immediately grants organization-wide control.
4. Roster approval must never be expected from PM / AM / Team Leader.

8. Quick Decision Guide

If you want someone to...	Assign
Full system control including report emails	Super Admin
Full system control without report emails	Admin
Org-wide reports + manage users/projects, but no roster approve	Project Manager (operational RBAC doc)
Team-only goals / roster edit, no user management	Assistant Manager (operational RBAC doc)
