HRMS

Role-Based Access Control

Operational Roles - Access Reference for Managers

Covers: Project Manager, Assistant Manager, Team Leader, QA, and Agent.
Admin and Super Admin are documented in a separate privileged-access PDF.

Document type	Access control reference (operational roles)
Audience	Managers, supervisors, QA leads
Companion doc	Admin and Super Admin Access Control
Date	18 September 2026
Classification	Internal / Confidential

Access is based on user role. Job designation is display-only and does not control permissions.

1. Purpose

This document explains what each operational HRMS role can see and do so managers can assign the correct role and understand team vs organization visibility.

Note: *Super Admin and Admin capabilities are listed in the separate Admin and Super Admin Access Control document - not in this PDF.*

2. Access Levels

Level	Meaning
No access	Feature is not available for this role
View	Can see data only (read-only)
Edit	Can create and update records
Manage	Full control (create, update, delete as applicable)
Approve	Admin / Super Admin only - see privileged access document

3. Roles and Data Visibility

Role	What data they can see
Project Manager	Entire organization
Assistant Manager	Own team / assigned agents
Assistant Team Leader	Own team only
QA	Agents assigned to them (+ own data)
Agent	Own data only

4. Feature Access Matrix

Dash (-) means no access. Roster approve/reject is Admin/Super Admin only.

Feature	PM	AM	TL	QA	Agent
Analytics / Overview	View	View	View	View	View
Billable report	View	View	View	View	Own
QA hours report	View	View	-	-	-
User Monthly Goals	Edit	Edit*	View	-	-
Project Monthly Report	View	View	View	-	-
KRA	View+	Scoped	Team	Scoped	Own
Tracker Report	View	View	View	View	-
Agent Files & QC	View	View	-	View	-
QC Report Overview	View	View	-	-	-
QA Agent Audit	View	View	-	Ltd	-
Manage Users	Manage	-	-	-	-
Manage Projects	Manage	Manage	-	-	-
Roster Management	Edit	Edit*	Edit*	-	-
Roster Approve / Reject	-	-	-	-	-
My Roster	-	-	-	View	View
Daily Tracker (Agent)	-	-	-	-	Edit
AI Evaluation	-	-	-	-	Yes
Salary details	View	-	-	-	-

*Abbreviations: PM = Project Manager · AM = Assistant Manager · TL = Team Leader · View+ = View and Export · * = team-scoped*

5. Role-by-Role Details

5.1 Project Manager

Organization-wide visibility for most reports.

- Can: view all analytics, tracker, QC, and KRA; edit User Monthly Goals; manage users and projects; edit and submit roster; view salary
- Cannot: approve or reject roster; lock roster weeks / holiday master; manage report emails

5.2 Assistant Manager

Team / assignment scoped access.

- Can: view analytics for assigned agents; edit User Monthly Goals for own team only; manage assigned projects; edit and submit team roster
- Cannot: manage users; approve roster; see organization-wide data outside assignment/team

Note: Team is locked in the UI for monthly goals and roster filters.

5.3 Assistant Team Leader (Team Leader)

Mostly view-only, with one important exception: can edit and submit roster for the team.

- Can: view team analytics, billable, monthly reports, KRA, and tracker report; edit and submit team roster
- Cannot: edit User Monthly Goals hours; manage users or projects; approve roster; access most QC manager modules

Note: Outside roster, the system treats Team Leader as read-only.

5.4 QA

Scoped to agents assigned to them.

- Can: view analytics, billable, audit, and KRA for assigned agents; maintain own QA hours; view own roster; view Tracker Report and Agent Files and QC; use QC form
- Cannot: manage users, projects, or roster administration

5.5 Agent

Self-service role. Default landing page is the Agent Tracker.

- Can: enter and edit own daily tracker; view own analytics, billable and QC, and KRA; view own roster; use AI Evaluation
- Cannot: see other agents' data; access Manage, roster management, or organization-level reports

6. Important Business Rules

1. Roster approval is not available to roles in this document - only Admin / Super Admin.
2. Project Manager can see org-wide data but cannot approve roster.
3. Assistant Manager is locked to their team for monthly goals and roster filters.
4. Team Leader is view-only except roster edit/submit.
5. Agents and QA use My Roster (view only), not Roster Management.
6. Creating a user with the wrong role immediately changes what they can see and do - choose carefully.

7. Quick Decision Guide

If you want someone to...	Assign this role
See all teams/reports, manage users/projects, but not approve roster	Project Manager
Manage one team's goals, projects, and roster (no user management)	Assistant Manager
View team reports and update roster only	Assistant Team Leader
Review QC / assigned agents and enter QA hours	QA
Enter daily work and view own reports only	Agent
Full system control / roster approval	See Admin and Super Admin document
